

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. A PORTABLE book of marks and monograms is a necessary complement to the extensive ceramic works of the present day.

In this little volume, care has been taken not to assign a locality to marks except upon unquestionable authority. It is better to raise doubt than to sow error. The one time and research may dispel; the other it is impossible to eradicate when once allowed to take root.

* The extraordinary event of the Comet of 1769 suggested to the Directors of the Manufactory the idea of transmitting the remembrance of it by their productions. A vase was therefore made in a spherical form, with a bronze appendage, representing the long luminous tail of the comet; and many of the painters substituted for the ordinary mark, which for this year was the letter Q, the following figure :—

NOTE TO M. 65A, PAGE 12.

This mark of Orazio Fontana, given by Passeri, but never seen, is upon four vases 26 in. high, with the Triumph of Galatea and other classical subjects, in the possession of a lady in Paris, only a D is substituted for the F. We give a fac-simile, half size of the original.

SAMPSON LOW, MARSTON, & CO.'S NEW BOOKS.

ALBERT JACQUEMART.

HISTORY of the CERAMIC ART: Descriptive and Analytical Study of the Potteries of all Times and of all Nations. By ALBERT JACQUEMART, Author of 'The History of Porcelain,' 'The Wonders of Ceramic,' &c. Work containing 200 Woodcuts by H. CATENACCI and J. JACQUEMART. 12 Steel-plate Engravings by JULES JACQUEMART, and 1000 Marks and Monograms. Translated by Mrs. BURY PALLISER. In one vol., super royal 8vo, of about 700 pp., cloth extra, gilt edges. 42s.

"Altogether we think this is likely to be one of the most popular books of the season. It affords a happy instance of the union of taste and science, of learning and refinement, with a very distinct leaning towards the elegant aspect of the subject."—*The Athenæum*.

"Mrs. Bury Palliser gives us a beautifully bound and richly illustrated translation of Jacquemart's 'History of the Ceramic Art.' M. Jacquemart has thoroughly studied the pottery of all nations, which makes his book not only an authority to be consulted upon occasion by connoisseurs, but a volume of great interest to be read by ordinary people. Believing that the history of his favourite art is the history of the world, M. Jacquemart traces it with enthusiasm from age to age, and from country to country, while his knowledge of actual history itself enables him to give us full accounts of the costumes and manners, the figures and incidents depicted on the vases and platters of ancient and modern Ceramic art. This is one of those few gift books which, while they can certainly lie on a table and look beautiful, can also be read through with real pleasure and profit."—*Times*, December 13.
